

Hello,
I Am
Rami AlAjo

About Me

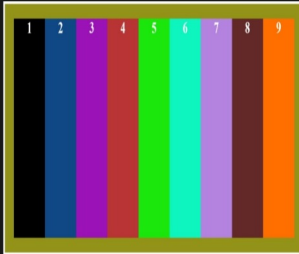

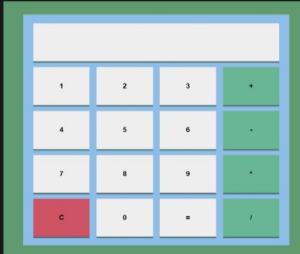

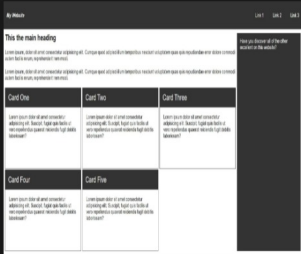

Exploring Web Development

Aspiring to become a FULL STACK WEB-DEVELOPER specializing in HTML, CSS, and JavaScript. My goal is to create visually appealing and user-friendly websites, and I am committed to mastering both front-end and back-end technologies. Through ongoing learning and practical experience, I aim to become a skilled developer capable of building dynamic and scalable web applications.

Education

I studied Mechanical engineering but I have a strong passion for technology. I have taken elective courses in web development and am particularly interested in pursuing a career in this field. Currently, I am undergoing training at the Orange Coding Academy to further enhance my skills and gain practical experience. I am excited about this opportunity and eager to apply what I learn to real-world web development projects in the future.

My Projects

Services

Web Design

I provide comprehensive web development services, specializing in creating dynamic, responsive, and user-friendly websites. Using Bootstrap, and Angular.

Back-End Development

Specialized back-end development services to build robust and scalable server-side applications. Include, Server-Side Programming with .NET, Database Management Integrating SQL Server databases. Create and maintaining RESTful APIs for seamless data exchange.

Data Analysis

provide data analysis and statistical services to help you make informed decisions. including Data Analysis Using Python. Conducting comprehensive statistical studies and generating insights. Create visual representations of data.
